Nordstrom is here to help with perfect gifts for everyone at any price point, find festive party looks for this season's celebrations, and make memories with holiday experiences like visits with Santa. To get glam for the season, customers can indulge in beauty events across the country to receive complimentary tutorials and services, take home free samples from top brands, and more.

On November 27, Nordstrom NYC will unveil a spectacular larger-than-life immersive installation, *The Blizz* on 57th Street. Nordstrom is also giving customers the opportunity to purchase iconic NYC experience packages for a memorable holiday in the Big Apple. No matter where and how customers choose to shop, Nordstrom is here to bring joy and be the one-stop shop for all their holiday needs.

An Enhanced Digital Experience

Customers can stay digitally connected to shop anywhere, anytime, with convenience at their fingertips. Starting with a vibrant new look and feel on the homepage, the refreshed app aims to inspire and make the experience feel more personal. Shopping at Nordstrom has never been easier, whether customers choose to shop online or in-store, Nordstrom is here to serve them on their terms. Here are some of the ways the reimagined mobile app is making shopping more magical this holiday season:

Get Inspired

With a quick swipe, Nordstrom has made it easy for customers to access unique editorial content to stay on top of the latest fashion and beauty trends. From runway-inspired looks to street-style must-haves, Nordstrom is here to keep customers excited about getting dressed. The refreshed app has interactive new features like trend reports, which blend the expertise of Nordstrom's stylists with the power of generative AI to scale and deliver the most relevant trends. Users can interact with the Style Swipes feature which makes product recommendations based on their habits and preferences. Customers will also find fun and approachable styling videos to help inspire their sartorial sense.

Personalized Recommendations

Nordstrom aims to make customers feel good and look their best and whether they choose to shop in-store or engage digitally, the personal connection they have with Nordstrom should remain the same. Just like working with their favorite stylist in-store, the more customers interact with the Nordstrom app, the better the app will get to know them through enhanced learning features, making for better and more personalized recommendations. With the new capabilities of the refreshed app, customers will be served with more brands and products that matter to them, along with inspirational content to bring it all together.

Find Favorites Faster

Gone are the days of scrolling through endless pages of irrelevant search results. The refreshed Nordstrom app makes it even easier for customers to find exactly what they have in mind. They can simply describe what they are looking for in their own words and the app does the rest using improved search capabilities. Whether they are thinking about a 'cozy red sweater' or a 'sparkly party dress,' their perfect match is just a click away.

It Pays to be Loyal with the Nordy Club
