STORE DESIGN: The Nordstrom NYC Men's Store features the company's newest store design concepts, including an all-glass façade to bring in more natural light, unboxing the display windows, and connecting the shopping experience to the city. An open, flexible floor plan allows for evolving how we curate and show products over time depending on what New York customers respond to. The store environment creates a sense of discovery, allowing customers to navigate easily and find new brands they haven't experienced before.
